

AUTOMATIC AIR AND GAS VENTS FOR LIQUID SYSTEMS AE37.2

(Carbon steel 11/2" x 1", 2" x 1", DN 40 x DN 25 and DN 50 x DN 25)

DESCRIPTION

The AE37.2 range of high capacity automatic vents are designed to remove air or gases from water and or other liquid systems, without requiring any external source of energy.

They are capable of handling significant loads during start-up while still being able to discharge smaller loads in continuous modulating operation with one single orifice.

These ball float type vents are manufactured in carbon steel, available with various soft sealing options, and can be used in combination with other air elimination and separation systems or directly applied at high points in the pipelines.

MAIN FEATURES

Suitable for start-up and continuous operation with one single orifice. Allows fast and easy inline maintenance. Corrosion resistant internal parts. No balancing pipe required.
